**PURE BLOOD, BONE AND TANKAGE FERTILIZERS.**

HOME OFFICE ATLANTA  
BRANCH OFFICE MONTGOMERY

The SOURCE OF AMMONIA is the most vital consideration in the selection of fertilizers. Being the most expensive element of plant food, it should be bought in such form that it will neither leach out in the soil nor lie dormant because of its slow process of nitrification.

The MORRIS BRANDS are ammoniated with the world's best nitrogen-bearing materials, and have proven their superiority in crop production over other fertilizers by scores of tests. This claim is substantiated by the testimony of farmers who used them last year by the side of other brands, and whose letters appear in our current Year Book. Call on your dealer, or write us for a copy.

This is the guarantee we attach to every bag of guano we ship. Can you get a similar WRITTEN GUARANTEE on any other goods on the market?

**OUR GUARANTEE:**  
"TO THE PURCHASER OF THIS GUANO: We guarantee the Ammonia in this guano to be 100 per cent PURE ANIMAL MATTER, derived solely and entirely from the HIGHEST GRADES OF PACKING HOUSE BLOOD AND ANIMAL TANKAGE, made and selected for us by our parent organization, Morris & Company. It is the FIRST CHOICE from six of the largest packing plants in the world."

## THE DENOMINATIONAL COLLEGE IS THE HOPE OF THE COUNTRY

STRONG EDITORIAL ARTICLE IN THE CHRISTIAN OBSERVER, LEADING PAPER OF THE SOUTHERN PREBYTERIAN CHURCH

There was recently a very strong article appearing in the Christian Observer on The Place and Claims of the Christian College and we quote an extract from it feeling sure that it will prove beneficial to our readers, and the friends of Anderson College:

"It was no less a man than the Hon. James Bryce who said on his return to England some years ago, after visiting America for the first time in thirty years, that of the two or three significant changes he noticed here, one was the progress and enthusiasm shown in the wide field of education. Everywhere he saw the witnesses of a mighty movement. In the universities enrolling their hundreds and their thousands in colleges with their increasing endowments and their broadening courses; in the technological schools with their costly and elaborate equipment; in the correspondence schools with a student body scattered through States and territories; in the night schools with their deeply earnest classes; in the professional schools of every time and grade; in the normal schools, academies, church and private schools, and in the great system of public schools for all grades of work from kindergarten through the high school, in all of this he recognized the life of our land today.

It needs no argument to show that he was right. The figures alone are eloquent. More than 21,000,000 scholars are enrolled in the schools of the United States, or more than one in five of our population, and the numbers are increasing. Nearly every State is cutting down the percentage of illiteracy in the resolve every child within its borders shall have equal chance with every other, no far as education, can give that chance, to make the most of gifts and environment and opportunity.

That which develops man and body and leaves the whole tract of the moral and the spiritual nature untouched? That which speaks eloquently of the universe, but says nothing about the Creator? That which speaks in admiration of the intricate structure of man, but leaves out of view the Maker? That which exhibits the tri of the race, but gives no credit and no thought to the divine Artificer who gave all that made them possible? That which traces the world's march of events, but says no word of the God who guides?

Just in this is the peril and the peril cannot be averted—its full increase—if we stand idly by and surrender to the State, unaided or unchecked as the case may be, the education of our youth. Let me hasten to add that the public school system as a system is not to be condemned or opposed. It is needed. It is supported in large part by the taxes of our Christian people. It is doing splendid service. In certain of its achieving work which the Church needs only rarely to duplicate. And it is enrolling in the ranks of its principals, presidents and teachers many of the most earnest Christian men to be found in the country over.

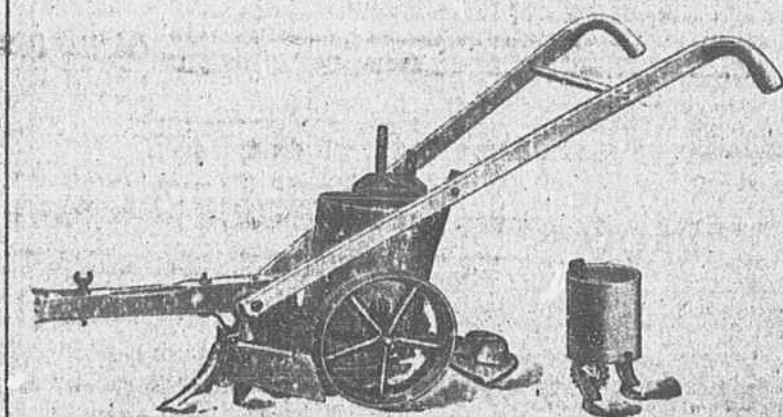

What our Christian people need to do—must do—is to keep these their own institutions, free from anti-Christian influence and teachings and to stimulate them to the achievement of the highest ends.

But we need to go further. We need to give encouragement and active support to the schools that stand out before the world as Christian schools and are thus free to each the truth as we see it and to exert upon their students the very strongest positive Christian influence. We owe it to these schools to do this, provided the training they give is thorough as well as Christian, for they are court of our own denominational people, cut off by their own choice and ours from State aid, and depending for maintenance in part and for their growth almost wholly upon our support.

But for another and an even larger reason we need to do this. College gathers in and trains its students at a time when impressions are made that last through life; when ideals are shaped and habits are fixed for all the future; and when, largely, the life work is chosen into which the life forces will be poured. A college that has a student between the years of 17 and 21 determines to a very large degree the influence he is to wield out in the world to which it sends him. We owe it to the student, therefore, to give him that education in surroundings and under influences the most favorable to his symmetrical development, physical, mental, moral, spiritual; to place him within a college which, while laying emphasis upon knowledge, emphasizes supremely the fear of the Lord as the beginning of wisdom and the knowledge of the Holy One as understanding.

This applies, I need not say with equal force to colleges for women and to no small degree to the secondary schools.

## THE COLE COMBINATION PLANTER, NO. 5

The Cole combination Planter is wonderful in its perfect adaptation to the planting of a great variety of seeds. The description of the No. 1 applies to the No. 5. They are the same except that the No. 5 is fitted with a Seed Dropper for planting corn, peas, sorghum, peanuts, cantaloupes, beans garden peas, and similar seeds. This attachment is complete in itself with brush, knock-out and plates, and is the most perfect dropper ever made. We make special plates for each kind of seed. The planter is as perfectly suited to each crop as if it were made to plant that one and no other.

The Seed Dropper can be instantly attached or removed without the use of even a wrench. The cotton planting parts are never moved or changed. There is nothing complicated about this planter. It is simple, efficient, durable, easy to adjust and easy to run.

This planter is furnished with a Special Sword Opener for corn and other seeds, and also with a Special Cotton Opener. The depth quantity of seed, and distance, are easily regulated.

This is no cheap make-shift combination. It is the best money and brains can make it. The cotton drilling parts are made especially for cotton and nothing else. The Corn Drpper is superior to the finest Northern makes. The No. 5 or the No. 7 plants each crop better than any other brand of separate or combined machines on earth. Try these planters and you will never again plant corn, peas, peanuts, etc., by hand. The planter does the work better every way and saves more than half the labor.

## SULLIVAN HARDWARE CO.

Anderson, S. C. Belton, S. C.

**A WORLD OF EYE TROUBLE**  
would be avoided if people had their sight properly attended to. Be one of the wise ones and wear glasses only after we have made a thorough examination of your eyes. Then your glasses will be just what your sight requires. Any other method of selecting glasses is dangerous. And your eyes are too precious to subject them to any avoidable risk. Prices reasonable \$3.00 to \$5.00 and upward. Repairs on frames and parts 10 cents and upward.

Park, who declared that he simply couldn't stand the "Yankee bread" they serve in hotels at Washington. "Seems like I just can't get used to it," he is quoted as saying. "The crust is about an inch thick and as hard as a plank. You could take a loaf of the stuff and knock a horse down with it. Through the center of the loaf is a soft damp kernel, but if you eat that it is like putting so much putty in your stomach."

Greener Prescribe Price

New York April 1.—Sugar prices in West Virginia are prescribed by the Wholesale Grocers' association of that state through the fixing of an arbitrary freight rate, it was testified to-day by J. P. Maxwell, manager of a Wheeling, W. Va., grocery firm, in the hearing of the government's dissolution suit against the American Sugar Refining Company. Members of the organization, however, care not object to sell at the prescribed price said the witness.

### GOV. BLEASE BACK AT CAPITAL

**Mr. Dominick Looked Into Cases—The Vaughn Case**

Columbia, April 1.—Governor Blease returned on Wednesday from Washington, where he spent several days on business. The governor was accompanied on this trip by Mrs. Blease and assistant attorney General Fred J. Dominick.

Mr. Dominick left Columbia on Wednesday afternoon for the Third District, in the interest of his candidacy for Congress. He will visit Anderson while he is away on his rounds. He states that he is very much encouraged in the race, and from recent communications received from supporters in different parts of the district, and from what he knows of the situation, he is confident of the result in the primary this summer. Mr. Dominick aims with governor, however, was in Washington when the National House voted on the canal tolls exemption matter, which has created such great interest throughout the country. Neither Mr. Dominick nor Governor Blease had any statement to make in regard to the matter upon their return to the state.

There were several South Carolina cases which have been appealed to the supreme court of the United States, which Mr. Dominick representing the attorney general's office, went to Washington to look into. He found the Vaughn case had been docketed, and it will be called, it is presumed, and he argued, as soon as it can be reached. He found that the case of the State vs. Bethune, the State vs. Matery and the State vs. Joe Grant, had not been docketed and the proper steps will be taken to have them docketed. The case of the State vs. Joe Grant in the case of the Edgewood case, which has been pending regulation in the Pennsylvania courts for a good many months. Solicitor General Timmerman, of the eleventh circuit, has been in Pennsylvania in the interest of the matter several times. Regulation for this case was issued by Governor Blease and the regulation has been upheld by the Governor of Pennsylvania, and by each of the Pennsylvania state courts and each of the United States courts in which it has been tested.

Governor Blease stated that he had enjoyed very much his trip to Washington, and had transacted his business which he went to look after. He said that he had nothing for publication in regard to his visit to the national capital.

A new built in France for a new 240-horsepower power light-house in Hawaii is expected to project the light 50 miles.

### CLEAN UP AND SAVE BABIES' LIVES

**Great Majority of Infantile Deaths During Summer Due to Bacterial Infection**

Dirt fattens flies and kills babies! Dirt in itself, such as rubbish and other waste, does not directly cause disease unless it contains organisms impregnated with contagion. But dirt of any kind is a breeding spot for flies and other vermin, which act as direct carriers of contagion from sick to healthy persons.

A great majority of the deaths of the young, particularly during the summer, are due to infection by bacteria. In order for these great enemies of mankind to thrive there must be means for their growth, and dirt is the culture field or breeding place. The germs which enter milk or other food are deposited by flies through the means of circulating dust or otherwise. Sunlight, the removal of garbage and the use of plenty of soap and hot water are the best means of reducing this source of danger.

Now, everybody get on the job and clean up this town.

Save life and preserve the life of the babies.

### GUNMEN SHUN IDENTIFICATION

**Will Hide Hereafter When Whitman Sends Interviewers**

New York April 1.—Adverse to being subjected to further identification processes, "Dago Frank" "Giroflet," "Lefty Lewis," "Rocky," "Gyp," the "Black," "Horowitz" and "Whitney Lewis," "Goldenshuler," the four gunmen convicted of the murder of Herman Rosenthal, and now awaiting execution at Sing Sing prison, have served notice on the authorities that hereafter they will go into hiding upon their conviction should other efforts be made to identify them in connection with the case. This was learned to-night through a statement issued from the office of District Attorney Whitman.

In preparation for the trial of Charles Becker, the former police lieutenant, whose conviction and sentence for the murder of Rosenthal recently was set aside by the court of appeals, the witnesses had sent to Sing Sing a witness whose formal identification of the four gunmen was deemed desirable. When the witness appeared two of the gunmen jumped into bed and pulled the covers over their heads. One of the other two eluded scrutiny by covering his face with his hands, while the fourth hid behind the bed.

Made a Two Straights.

Louisville, Ky., April 2.—The Louisville American association team made it two straight from Cincinnati here today, winning 2 to 1. Cincinnati allowed ten hits in six innings. McCarty hit in the sixth brought in two runs.
